# Junze Wu

Major in Computer Science, 3rd year
github.com/junzew

## Technical Skills

- Language: Java, C, C++, Python
- Web: TypeScript, HTML, CSS, JavaScript (Node.js, Vue.js)
- Mobile: Android
- Database: SQL, PHP
- Tools & IDEs: Git, Subversion, Android Studio/IntelliJ IEDA, Webstorm

## Technical Projects

- ShareTango *(Android app)* *Nov 2016 - Present*
  - Currently developing a weakly consistent, distributed, peer-to-peer mobile application for sharing music through Wifi-Direct
- V2EX *(Android app)* *Jul 2016*
  - Created a mobile client for v2ex.com, an online community for creative designers
- Kanzhihu *(Android app)* *May 2016*
  - Implemented an app based on REST APIs for zhihu.com, a popular Chinese question and answer website
- Personal website *Sep 2016*
  - Built with Bootstrap http://junzew.github.io

## Course Projects

- FTP client & server *(Command line programs)* *Mar 2017*
  - Implemented a subset of the FTP protocol
  - Wrote client in Java and server in C
- UBC Insight *(Web app)* *Sept - Nov 2016*
  - Developed a web application for querying UBC courses and classrooms data
  - Implemented the backend with TypeScript and Node
  - Designed and built an UI using the MVVM framework Vue.js
- PHPizza *(Database & Web app)* *Sept - Nov 2016*
  - Designed an online pizza ordering and delivery system
  - Maintained MySQL database and scripts for queries
  - Developed website in PHP with Laravel
- MindTheGap *(Android app)* *Oct 2015*
  - Developed an app for retrieving subway arrival and location information
  - Integrated Transport for London Open Data API

## Contest

Microsoft Beauty of Programming *Apr - May 2016*

- Developed a REST endpoint for finding n-hop paths in Microsoft Academic Graphs using Node.js
- Deployed the project to an Azure virtual machine

**Junze Wu**

## Work Experience

- **Junior Software Developer** *Sept 2017 – present*
  AppNeta, Vancouver BC, Canada
  - Design and implement network level features using Linux and C++ and Python
  - Enhance the system and network configuration software of a Linux based network appliance
- **Undergraduate Teaching Assistant**
  The University of British Columbia, Vancouver, BC, Canada *Jan - Apr 2017*
  - Held labs and office hours for an introductory software engineering course
  - Assisted in developing automated tests for grading project deliverables
- **Android Development Intern**
  Blue Whale Media, Beijing, China *Jun - Aug 2016*
  - Refactored the content sharing, the TCP keep-alive, and the JSON parsing modules
  - Worked extensively with third-party Android libraries (Netty, FastJSON, Umeng, etc.)
  - Integrated social media platform SDKs into the project
- **Android Development Intern**
  People's Daily Online, Beijing, China *May - Jun 2016*
  - Participated in developing the Android client app for Inner Mongolia Daily, a provincial news agency
  - Assisted in building and modifying application user interface

## Education

- **The University of British Columbia** *Vancouver, BC*
  Bachelor of Science, Computer Science *Sep 2014 - Present*

## Academic Honors

- UBC Dean's List *2015-2016*
- UBC Computer Science Scholarship *2016*
- David Shum Memorial Prize in Computer Science *2016*
- James Ross Ground and Fergus Ross Groundwater Scholarship in Science *2016*
- Joseph P. Ruffel Scholarship in Science *2016*
- Trek Excellence Scholarship for Continuing Students *2016*
- Golden Key International Honor Society *2016*

## Extracurricular Activities

- UBC Undergraduate Research Opportunities (URO) club *Sept 2016 - Present*
  - Developing an Android app (ShareTango) in a research group led by a graduate student mentor
- Competitive programming *Sept 2016 - Present*
  - Occasionally practice solving algorithmic problems with the UBC ACM training group
  - Participated in online programming contests held on Codeforces
